

GOV. ROY COOPER, WE NEED YOUR LEADERSHIP ON STANDING UP TO DUKE ENERGY

Duke Energy is a U.S. leader – IN CLIMATE POLLUTION...

Duke Energy is the worst climate offender among U.S. electricity providers and plans to add more fossil fuel power plants than any other U.S. corporation.

And Duke plans to raise our rates to build OVER 50 FRACKED GAS POWER PLANTS

Duke Energy has dozens of gas units that aren't being used. Duke's 15-year plan would leave Carolinas customers paying BILLIONS for gas-burning plants that are forced to retire early due to climate change.

And Duke is weak on CHEAPER, CLEAN POWER.

Despite all its greenwashing, Duke gets only **5%** of its electricity from renewables in the Carolinas – while the national average is **18%**.

TAKE ACTION for energy & climate justice.

URGE GOV. COOPER TO STOP DUKE ENERGY'S
CLIMATE-WRECKING GAS EXPANSION.
