

DOES DUKE ENERGY THINK YOU'RE STUPID?

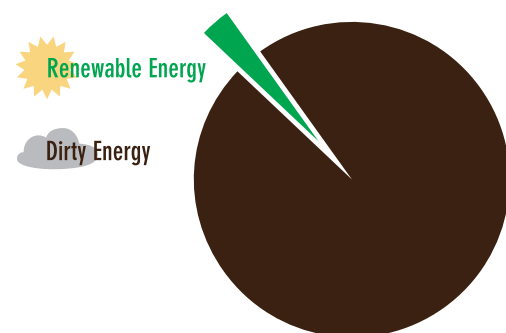

DUKE ENERGY TALKS about solar energy, but keeps forcing dirty, expensive power plants on North Carolina.

DUKE ENERGY BRAGS about several new solar farms in North Carolina. But Duke's renewable power commitment is a pathetic 4% in 2029.

In reality, **DUKE ENERGY IS TRYING TO DESTROY** our growing solar industry to protect its "build plants, raise rates" business plan and monopoly control.

DUKE ENERGY IS STALLING hundreds of large-scale solar projects, and wants to pay customers far less for the solar power they put onto the grid.

**DON'T LET DUKE ENERGY BLOCK
YOUR RIGHT TO CHOOSE
CLEAN, AFFORDABLE SOLAR POWER.**

*Solar helps everyone by
creating thousands of
North Carolina jobs,
cutting pollution, and
eliminating the need for new
fracking gas and nuclear
power plants – and Duke's
ongoing rate hikes.*
