

40+ SCIENTISTS URGE GOV. COOPER AND DUKE ENERGY CEO LYNN GOOD TO STOP EXPANDING FRACKED GAS

Climate disasters are devastating North Carolina communities ... and getting worse.

We must phase out fossil fuels, but Duke Energy wants to keep building dirty power plants!

North Carolinians want clean, inexpensive power and the jobs that go with it.

“ Without your action, we remain concerned that North Carolina's positive climate efforts will be outmatched by Duke Energy's expanding use of natural gas. ”

- DR. DREW SHINDELL, a globally prominent climate scientist at Duke University, in a letter to Governor Roy Cooper and Duke Energy CEO Lynn Good
