

# Governor Cooper: We Can't Get There from Here without Rooftop Solar

Dear Governor Roy Cooper:

We the undersigned are proud owners of rooftop solar, helping to turn North Carolina's energy landscape green and save our families money. We are writing to implore you to protect North Carolina and our privately owned solar arrays from Duke Energy. The Net Energy Metering docket presently before the North Carolina Utilities Commission would increase solar customers' monthly fixed costs and decrease compensation for excess solar energy exported to the grid.

We made a decision to invest in solar energy based on the rules in place at the time. Duke Energy should not be allowed to retroactively change the value of those private investments. Our rooftop arrays are one of the few sources of energy in North Carolina not controlled by a monopoly utility. Duke Energy does not want to compete with rooftop solar, which is clean, affordable energy. Duke Energy prefers building costly fossil-gas plants.

We need to make rooftop solar more attractive to homeowners, increase access for low-income families and save all ratepayers money on their bills.

Please stop Duke Energy from taking North Carolina backwards. Rooftop solar must be a formidable part of North Carolina's goal of reducing carbon dioxide in the electricity sector 70 percent by 2030. Instead, Duke would have us spend our money to import fossil fuels. From 2017 through 2021, Duke Energy customers paid over \$10 billion for coal and fossil gas. That money came out of ratepayers' pockets and went right out across state lines. And the fossil fuel bills for 2022 will be much higher.

Attorney General Josh Stein has requested that the Net Energy Metering docket be delayed until a Carbon Plan has been approved. We agree. Although rooftop solar has the potential to provide 35 percent of North Carolina's electricity, it is barely mentioned in Duke Energy's draft Carbon Plan. Let's use local North Carolina energy.

We are in a climate emergency. This is no time to put the brakes on rooftop solar. Please help us protect the value of our private investments and ensure that North Carolina meets the challenge, for us and our children, and generations to come.

Thank you.

cc: Attorney General Josh Stein  
North Carolina Utilities Commission
